

RUSTAM LATYPOV

Sublinear Algorithms Group

Aalto University, Finland

A final-year doctoral researcher at Aalto University with research and teaching experience in algorithm design and combinatorics. My research interests lie in the mathematical foundations of distributed and parallel computing. I specialize in fundamental graph problems in modern models of computing. Finnish and Russian native speaker, fluent in English.

EDUCATION

- + **Doctoral Researcher** · Computer Science Jun 2021 –
Sublinear Algorithms [Group](#), Supervised by Prof. [Jara Uitto](#) *Aalto University*
- + **Master of Science** · Mathematics and Operations Research · GPA 4.9/5 2019 – 2021
Major in Applied Mathematics · 5/5 *Aalto University*
Minor in Computer Science · 4.8/5 [rustamlatypov/masters-thesis](https://rustamlatypov.github.io/masters-thesis)
- + **Bachelor of Science** · Engineering Physics and Mathematics · GPA 4.9/5 2016 – 2019
Major in Mathematics and Systems Analysis · 5/5 *Aalto University*
Minor in Computer Science · 5/5 [rustamlatypov/bachelors-thesis](https://rustamlatypov.github.io/bachelors-thesis)

ACADEMIC ACTIVITY

Teaching at Aalto University

- ♦ Advanced Course in Algorithms – Fall 2022, Fall 2023 (Head TA) [\[link\]](#)
- ♦ Principles of Algorithmic Techniques – Fall 2021, Fall 2023, Fall 2025 (TA/Head TA) [\[link\]](#)

Supervised an MSc thesis

- ♦ Hannes Sederholm, 2022 – *Distributed Drawing of Planar Graphs in the CONGEST model* [\[link\]](#)

Reviewer for TCS'26, PODC'26, STOC'26, SODA'26, FOCS'25, PODC'25, DISC'24, ICALP'24, ITCS'24, SWAT'24, PODC'23, DISC'23, PODC'22, DISC'22, DISC'21, OPODIS'20

LANGUAGE SKILLS

Spoken

- ♦ Finnish and Russian native speaker, fluent in English, and the basics in Swedish.

Programming

- ♦ Competent in Python, Scala, C/C++, Matlab. Familiar with Julia and R. Have practical experience with high-performance computing using MPI, CUDA, HIP, and OpenMP.

WORK EXPERIENCE

- **Doctoral researcher** · Aalto University Jun 2021 –
Solving fundamental graph problems in modern models of computing. Was on parental leave with my daughter from July 2024 to January 2025.
- **Research assistant** · Aalto University Mar 2020 – May 2021
Worked on distributed graph algorithms in the Massively Parallel Computation model. Developed and published a state-of-the-art graph coloring algorithm (Master's thesis).
- **Giant Leap Intern** · Vaisala Oyj Jun – Aug 2019
Developed software that successfully forecasted test failures in large scale radiosonde production using data mining, feature engineering and machine learning (XGBoost, Python).
- **Research assistant** · Aalto University Jun – Aug 2018
Studied ill-posed non-linear inverse problems for resistor networks both symbolically and numerically (Bachelor's thesis).
- **Peacekeeper** · Finnish Defence Forces Jan – Aug 2017
Conducted patrols, weapon handling drills and assisted local military in the Middle East as a company commander's signalist.

AWARDS

- ★ Awarded 5000€ – Encouragement grant, The Finnish Foundation for Technology Promotion [\[link\]](#)
- ★ Awarded 5000€ – Nokia Scholarship, Nokia Foundation [\[link\]](#)
- ★ Received 24-month funding for my doctoral studies (out of 20 applicants) – Dept. of CS, Aalto [\[link\]](#)
- ★ Awarded 1000€ for academic success in mathematics – Professor E. J. Nyström Fund [\[link\]](#)
- ★ Awarded $3 \times 500\text{€}$ for general academic success – School of Science, Aalto [\[link\]](#)

PUBLICATIONS (authors are ordered alphabetically, as is standard in the field)

9. Near-Optimal Directed Low-Diameter Decompositions [\[doi, arXiv\]](#)
Karl Bringmann, Nick Fischer, Bernhard Haeupler, Rustam Latypov
International Colloquium on Automata, Languages, and Programming (ICALP) 2025
8. A Simple Parallel Algorithm with Near-Linear Work for Negative-Weight
Single-Source Shortest Paths [\[doi, arXiv\]](#)
Nick Fischer, Bernhard Haeupler, Rustam Latypov, Antti Roeykoe, Aurelio Sulser
SIAM Symposium on Simplicity in Algorithms (SOSA) 2025
7. Adaptive Massively Parallel Coloring in Sparse Graphs [\[doi, arXiv\]](#)
Rustam Latypov, Yannic Maus, Shreyas Pai, Jara Uitto
ACM Symposium on Principles of Distributed Computing (PODC) 2024

6. Conditionally Optimal Parallel Coloring of Forests [doi, arXiv]
Christoph Grunau, Rustam Latypov, Yannic Maus, Shreyas Pai, Jara Uitto
 International Symposium on Distributed Computing (DISC) 2023
5. Adaptive Massively Parallel Connectivity in Optimal Space [video, doi, arXiv]
Rustam Latypov, Jakub Lacki, Yannic Maus, Jara Uitto
 ACM Symposium on Parallelism in Algorithms and Architectures (SPAA) 2023
4. Fast Dynamic Programming in Trees in the MPC Model [doi, arXiv]
*Chetan Gupta, Rustam Latypov, Yannic Maus, Shreyas Pai, Simo Särkkä,
 Jan Studený, Jukka Suomela, Jara Uitto, Hossein Vahidi*
 ACM Symposium on Parallelism in Algorithms and Architectures (SPAA) 2023
3. Optimal Deterministic Massively Parallel Connectivity on Forests [doi, arXiv]
Alkida Balliu, Rustam Latypov, Yannic Maus, Dennis Olivetti, Jara Uitto
 ACM-SIAM Symposium on Discrete Algorithms (SODA) 2023
2. Exponential Speedup Over Locality in MPC with Optimal Memory [journal, doi, arXiv]
*Alkida Balliu, Sebastian Brandt, Manuela Fischer, Rustam Latypov,
 Yannic Maus, Dennis Olivetti, Jara Uitto*
 International Symposium on Distributed Computing (DISC) 2022
1. Memory Efficient Massively Parallel Algorithms for LCL Problems on Trees [video, doi, arXiv]
Sebastian Brandt, Rustam Latypov, Jara Uitto
 International Symposium on Distributed Computing (DISC) 2021

PROGRAMMING PROJECTS – github.com/rustamlatypov

- * **Parallel matrix multiplication** C++
 Parallel (CPU) matrix multiplication achieving 500-fold speedup w.r.t. sequential
- * **Tile-matching game** C++
 Tournament grade Tetris and Pentis with controls in accordance with the Super Rotation System
- * **Parallel radix sort** Scala
 Sequential and parallel (CPU) LSD radix sorts achieving 5- and 15-fold speedups w.r.t. scala.quickSort
- * **Inverse problem for resistor networks** MATLAB
 Solving non-linear, ill-posed inverse problems for resistor networks both symbolically and numerically
- * **Machine learning classifier for music genres** Python
 Solving a skewed, multiclass music genre classification problem with supervised PCA and SVM
- * **Parallel password cracker** Python
 A command-line tool for cracking passwords in parallel (CPU) using dictionary and hybrid attacks
